### ICD-10 Educational Seminar Series

#### Begin Your Preparation By Signing Up for A Phase I Live Seminar Today!

CPF has partnered with the Tennessee Medical Association

to bring you a three-phase educational program to take you and your practice through  
the steps needed to avoid disruption in patient care and reimbursement with the transition to ICD-10:

- **Phase I** (Live Seminars): "ICD-10: Everything You Know Is About To Change," begins November 2011.

- **Phase II** (Webinars): Phase II will roll-out in Spring 2012 with a series of webinars  
focusing on the impact of ICD-10 and the physician's responsibilities.

- **Phase III** will focus on educating practice coders and will be  
announced once ICD-10 codes are finalized.

## PEDIATRIC MEDICAL HOME SUMMIT

*Message from Michael D. Warren, MD MPH FAAP,*

*Director, Title V/Maternal & Child Health, Tennessee Department of Health*

### Medical Home Summit

**December 1, 2011**

**9 AM - 2 PM**

### Downtown Library in Nashville

The Department of Health's ECCS (Early Childhood Comprehensive Services) Program will host a **free**  
Pediatric Medical Home Summit on December 1, 2011 at the Nashville Downtown Public Library.  
This summit will provide an overview of the medical home approach with a focus on family-centered care,  
as well as presentations and networking opportunities with providers, payors, and families  
and hands-on tools for implementing medical home.

Our keynote speaker will be Dr. Deanna Bell, the Medical Director of Mercy Children's Clinic.

Another added feature is that a TNAAP coding expert will discuss strategies for coding to  
ensure reimbursement for medical home activities.

Registration is now open and space is limited.

## HPV VACCINE FOR BOYS

CDC's Advisory Committee on Immunization Practices (ACIP)

approved recently recommendations for routine vaccination of males 11 or 12 years old

with 3-doses of HPV4 to protect against Human Papilloma Virus.

The HPV vaccine will afford protection against certain HPV-related conditions and cancers in males,

and vaccination of males with HPV may also provide indirect protection of women

by reducing transmission of HPV.
